

## Technical characteristics - RES FC 1

|                           |                        |
|---------------------------|------------------------|
|                           | RES FC 1-72-32-90      |
| Number poles              | 2                      |
| Mechanical accuracy       | +/- 50 mn d'arc        |
| Maximal internal diameter | Ø90                    |
| Rated supply voltage      | 7V                     |
| Frequency                 | 10 kHz                 |
| Transformation ratio      | 0,25                   |
| Input impedance           | $Z_{ro} = 24 + j233$   |
| Output impedance          | $Z_{ss} = 478 + j1031$ |
| Phase shift               | 1°                     |
| Noise at null coupling    | < 3/1000               |
